

(First time to create repository)

- `git init` {.git is created}
- `vi .gitignore`
- `git add .`
add all files to staging area
- `git commit -m "comments ..."`
- go to github, add new repository of the same name
- `git remote add origin https://github.com/jyunming-chen/<dir>.git`
- `git push -u origin master`
- `git checkout -b gh-pages`
- `git push origin gh-pages`

(File update)

- {at master branch}
- `git add -i`
interactive add
- `git commit -m "comments"`
- `git push -u origin master`
- `git checkout gh-pages`
- `git merge master`
mirroring changes to gh-pages
- `git push origin gh-pages`
- {change back to master branch}
- `git checkout master`
